

# A Safety Solution Tailor-Made for Your Business

Safety is the right thing to do, for your workers, customers, the public and your bottom line. ESA's CSS program helps you:

- » **Reduce your risk** by identifying areas where you're not complying with all electrical safety laws and regulations.
- » **Reduce paperwork** by logging electrical work for review instead of requesting an electrical inspection for each job.
- » **Reduce downtime** by scheduling inspections and reviews at a time convenient for your business.
- » **Enhance the overall safety** of your facility with training and coaching from ESA experts.

## OUR VISION:

An Ontario where people can live, work and play safe from electrical harm.

For more safety tips and/or information about ESA, visit [esasafe.com](http://esasafe.com) or call **1-877-ESA-SAFE (372-7233)**

# CONTINUOUS SAFETY SERVICES

FOR INDUSTRY  
AND BUSINESS

# Good Safety is Good Business

Putting safety first is the right thing to do for your employees, customers and your business. From 2009 to 2018, 33 Ontario workers died and another 146 were critically injured from electrical contact. These tragedies are devastating for affected workers and their families.

The implications for your company can also be severe: disruption of operations, investigations, fines, lawsuits, criminal charges and lost productivity. The fact is people are still getting hurt in the workplace. Make sure it's not your workplace.

## Continuous Safety Services Customers Make a Difference

**Educational facilities** are keeping our children safe from potential electrical hazards.

**Property managers** are protecting tenants and unit owner investments.

**Retailers** are providing safe places to shop.

**Mining/aggregate operators** are reducing worker risk and meeting health and safety standards.

**Manufacturers** are creating safer workplaces and decreasing downtime.

**Municipalities/recreation facilities** are protecting the public and public places.

**Health care providers and long-term care homes** are protecting vulnerable residents by meeting Ontario Electrical Safety Code Standards.

**Hotel operators** are providing safe places for rest, travel and tourism.

## What you get with CSS

- » **Facility Review:** visual inspection of your electrical system to identify existing hazards.
- » **Regular Inspections:** scheduled reviews of specific electrical maintenance activities.
- » **Detailed Inspection Reports:** prioritized list of electrical concerns (defects) for your staff to address.
- » **Dedicated Electrical Inspector:** your inspector gets to know your business, and provide one-on-one support, information and guidance on electrical safety and Ontario Electrical Safety Code issues backed by a team of technical experts.
- » **Specialized Training:** ESA delivers training specific to your business needs and regulatory requirements. Electrical Safety & Code workshops are also available to build staff knowledge.
- » **Streamlined Approach:** reduce your Code-related paperwork and inspections with the use of an Online Logbook and support.

### Home Depot of Canada Inc

“We are very proud of the CSS program and the relationship we’ve built over the years. The program provides us with an easy way to meet due diligence requirements and a consistent approach to ensuring public and employee electrical safety.”

– Mukesh C. Desai, Senior Manager,  
Construction and Maintenance

### City of London

“The City of London’s Facilities Division has utilized the CSS program offered by the Electrical Safety Authority for years. The program has proven to be a valuable tool, and plays a critical role in our Electrical Safety Program. The latest version of the customer online portal is easy to use and allows us the flexibility required to ensure our staff and contractors have uninterrupted access to log any/all work required at our facilities. Over the years as a participant in the program we have established a strong relationship with our entire ESA team. It has provided us quick and easy access to support services, as well as training for our team of staff electricians and service contractors. The program is vital to ensuring that all of our corporate assets are safe for staff and the citizens of London.”

– Val Morgado, Manager Facilities Operations & Maintenance, City of London
