

Electrically Safe: Safety Awareness for Electrical Trades

METHODS OF DELIVERY

COURSE LENGTH

Online: 2 hr equivalent
21-day access
CEU Accreditation: 0.2

Learn to recognize everyday electrical hazards and work safely around electricity. Explore common workplace hazards, the effects of electric shock, and safe work practices to help prevent electrical incidents.

This course is ideal for:

- Persons working with electricity, such as electricians, electrical apprentices, and electrical technicians.
- Electrical contractors who want to strengthen their workers understanding of electrical hazards, safe work practices, and methods to reduce the risk of electrical incidents.
- Facilities employing electrical workers who want their staff to develop a strong understanding of electrical hazards, safe work practices, and how to reduce the risk of electrical incidents.
- Students, co-op students, pre-apprentices, and educators in electrical trades seeking a foundational understanding of electrical safety.

Topics include:

- Roles of regulators and workplace health and safety organizations
- Worker rights and responsibilities under the Occupational Health and Safety Act
- Fundamental electrical terminology and safety principles
- Effects of electric shock and arc flash
- Common causes of electrical incidents
- Hazard recognition and risk reduction strategies
- Electrical hazard reporting and incident prevention
- Managing electrical hazards using safe work practices
- Electrical equipment safety and Product Approvals
