

Electrically Safe: Safety Awareness for Non-Electrical Trades

METHODS OF DELIVERY

Online

COURSE LENGTH

Online: 1 hr equivalent
21-day access

CEU Accreditation: 0.1

Learn to recognize everyday electrical hazards and work safely around electricity. Explore common workplace hazards, the effects of electric shock, and safe work practices to help prevent electrical incidents.

This course is ideal for:

- Workers in non-electrical trades who work near electrical equipment or electrical hazards.
- Arborists, millwrights, heavy equipment operators, HVAC mechanics, roofers, construction workers, and other trades exposed to electrical hazards as part of their work.
- Employers and contractors who want to improve their workers' understanding of electrical hazards and safe work practices.
- General contractors who want new workers arriving on a jobsite to receive an electrical safety orientation.
- Students, co-op students, pre-apprentices, and educators in non-electrical trades seeking a foundational understanding of electrical safety.

Topics include:

- Roles of regulators and workplace health and safety organizations
- Worker rights and responsibilities under the Occupational Health and Safety Act
- Fundamental electrical terminology and safety principles
- Effects of electric shock and arc flash
- Common causes of electrical incidents
- Hazard recognition and risk reduction strategies
- Electrical hazard reporting and incident prevention
- Managing electrical hazards using safe work practices
- Electrical equipment safety and Product Approvals
