Virtual

Online: 21-day access
In-Person: Half-day
CEU Accreditation: MECP 0.4

Understand the hazards of electric shock, steps to manage hazards, basic Ontario Electrical Safety Code rules and electrical product approval requirements.

This course is ideal for:

- Those working with electricity, such as electricians, electrical apprentices, electrical engineers, and electrical technicians.
- Maintenance staff, machine operators, and facility managers who work with, or in proximity to, electrical equipment.
- Workers in industries such as construction, manufacturing, and mining, where electrical hazards are common.
- Safety professionals, managers, and supervisors responsible for electrical safety in the workplace.
- Those studying or instructing trades involving electricity, including high school and college students, as well as educators.

Topics include:

- Electrical terminology
- Strategies to manage electrical hazards
- How to report serious electrical incidents
- Effects of electrical shock and arc flash
- Ontario Electrical Safety Code (OESC) rules
- Electrical product approval requirements

Electrical Safety Awareness 1 (continued)

Registration Fees:

Delivery Method	Individual	Group**
