

# Principles of Electrical Safety in the Workplace

## METHODS OF DELIVERY

In-Person

Online

Virtual

## COURSE LENGTH

Online: 21-day access

In-Person: Half-day

CEU Accreditation: MECP 0.4

**This course outlines planning and assessment approaches to establish workplace electrical safety, for the protection of workers, by establishing methods to inform safe work practices.**

## This course is ideal for:

- Electricians and electrical engineers who want to expand their knowledge and skills related to electrical safety in the workplace.
- Maintenance personnel who want to ensure they are working safely and in alignment with the principles contained in CSA Z462.
- Supervisors and managers who want to enhance their understanding of workplace electrical safety and ensure their workers are protected from electrical hazards.
- Health and safety professionals who want to promote a culture of safety in their organization and develop effective safety programs.
- This course is ideal for anyone who works in an industry or profession where there is a risk of electrical hazards in the workplace. Whether you are an electrician, an electrical engineer, maintenance personnel, a supervisor, or a health and safety professional, this course will provide you with the knowledge and skills you need to promote workplace electrical safety and protect the well-being of workers.

## Topics Include:

- Electrically safe workplaces
- Safe work planning (equipment labelling, PPE selection for arc flash, and working distance)
- Hazard identification
- Risk assessment
- Hazard elimination and risk control
