

Carter Current's Electrical Safety Adventure

Presented by the Electrical Safety Authority

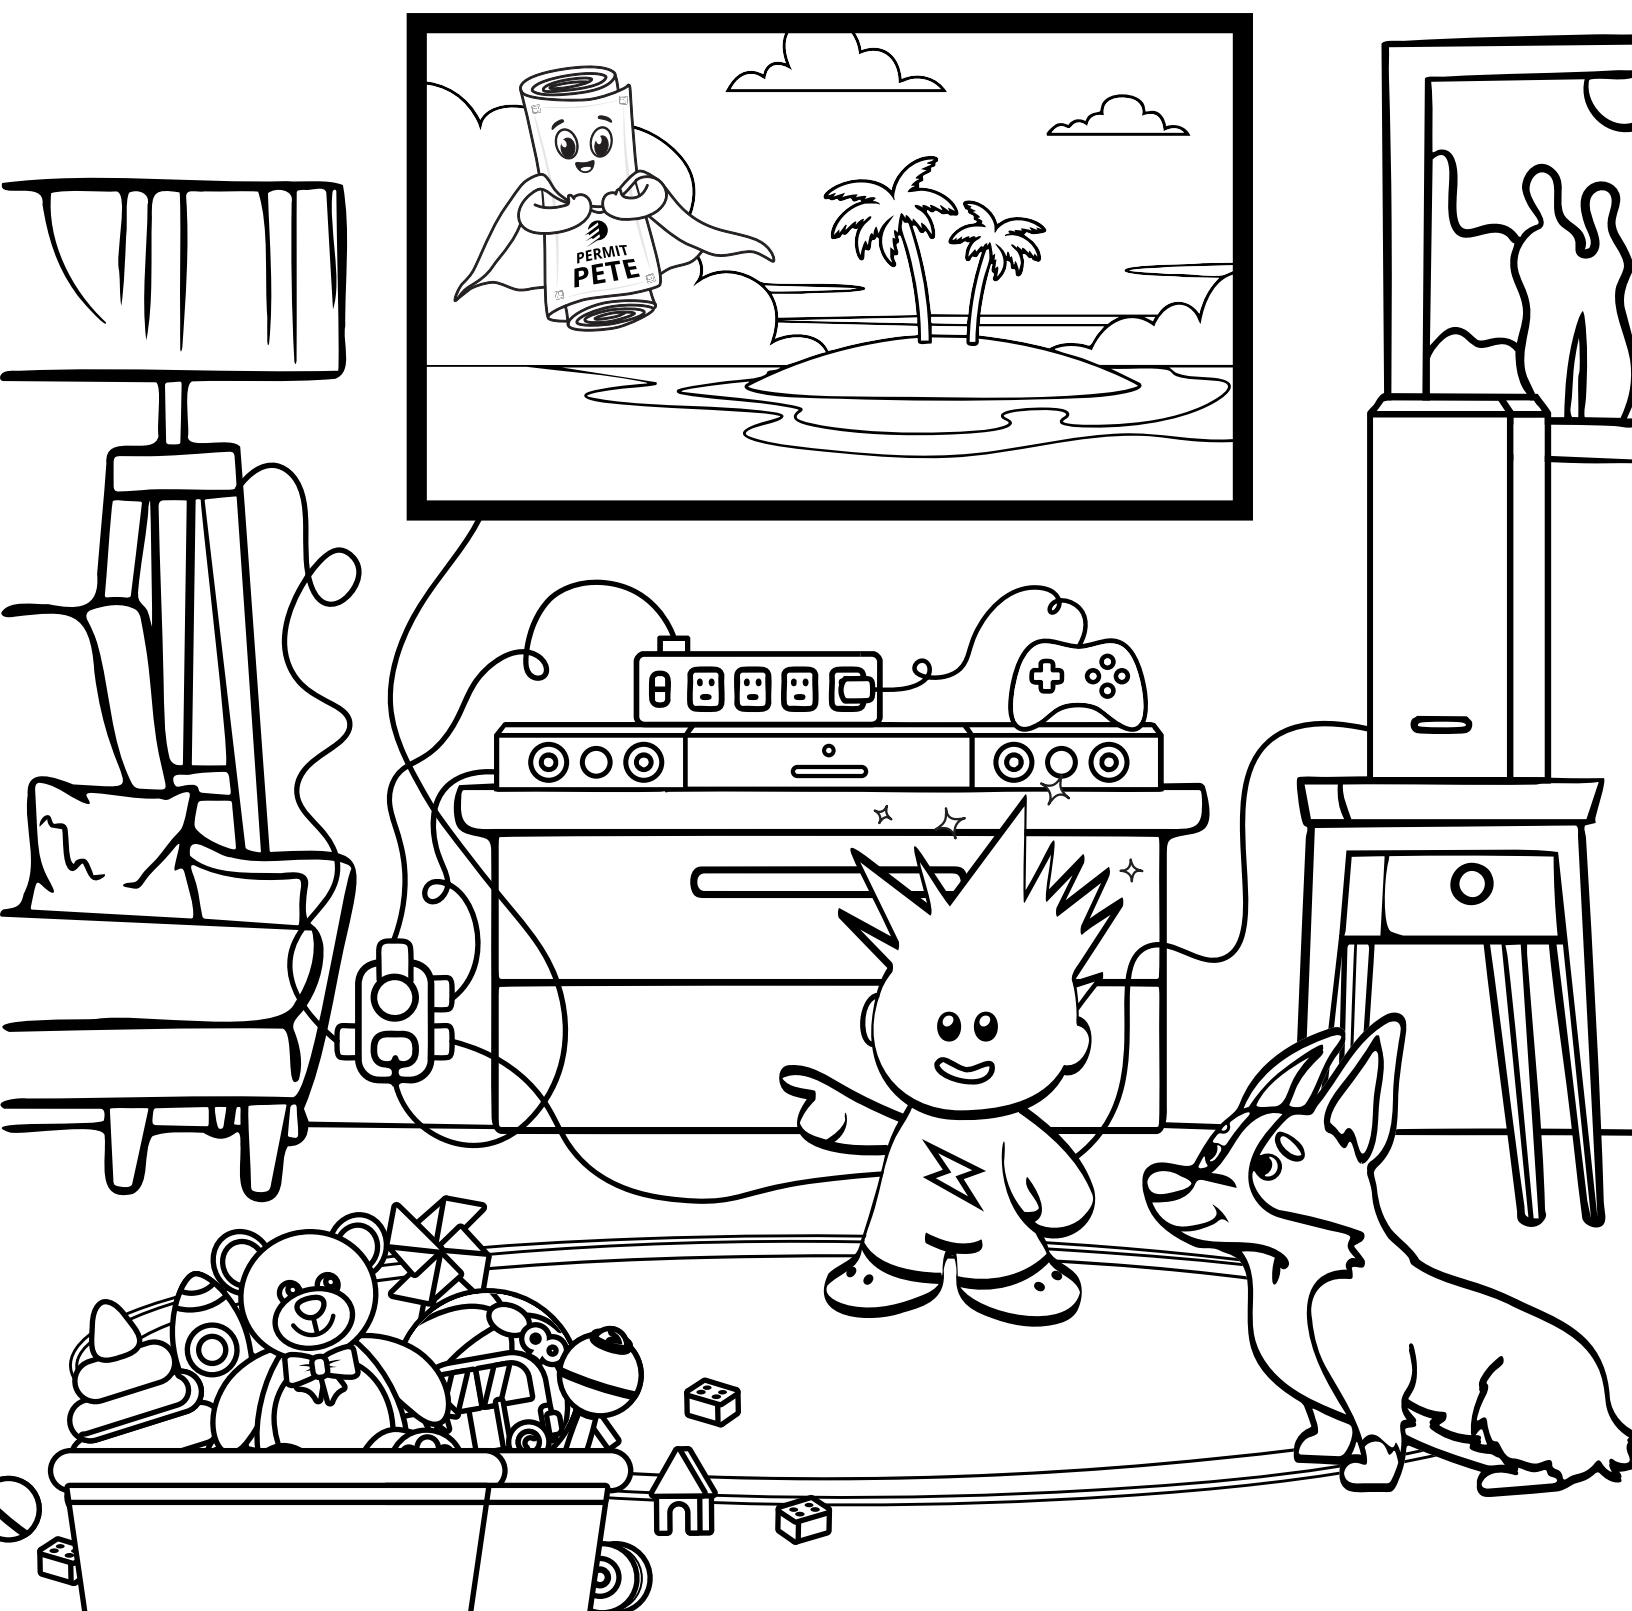

This book belongs to:

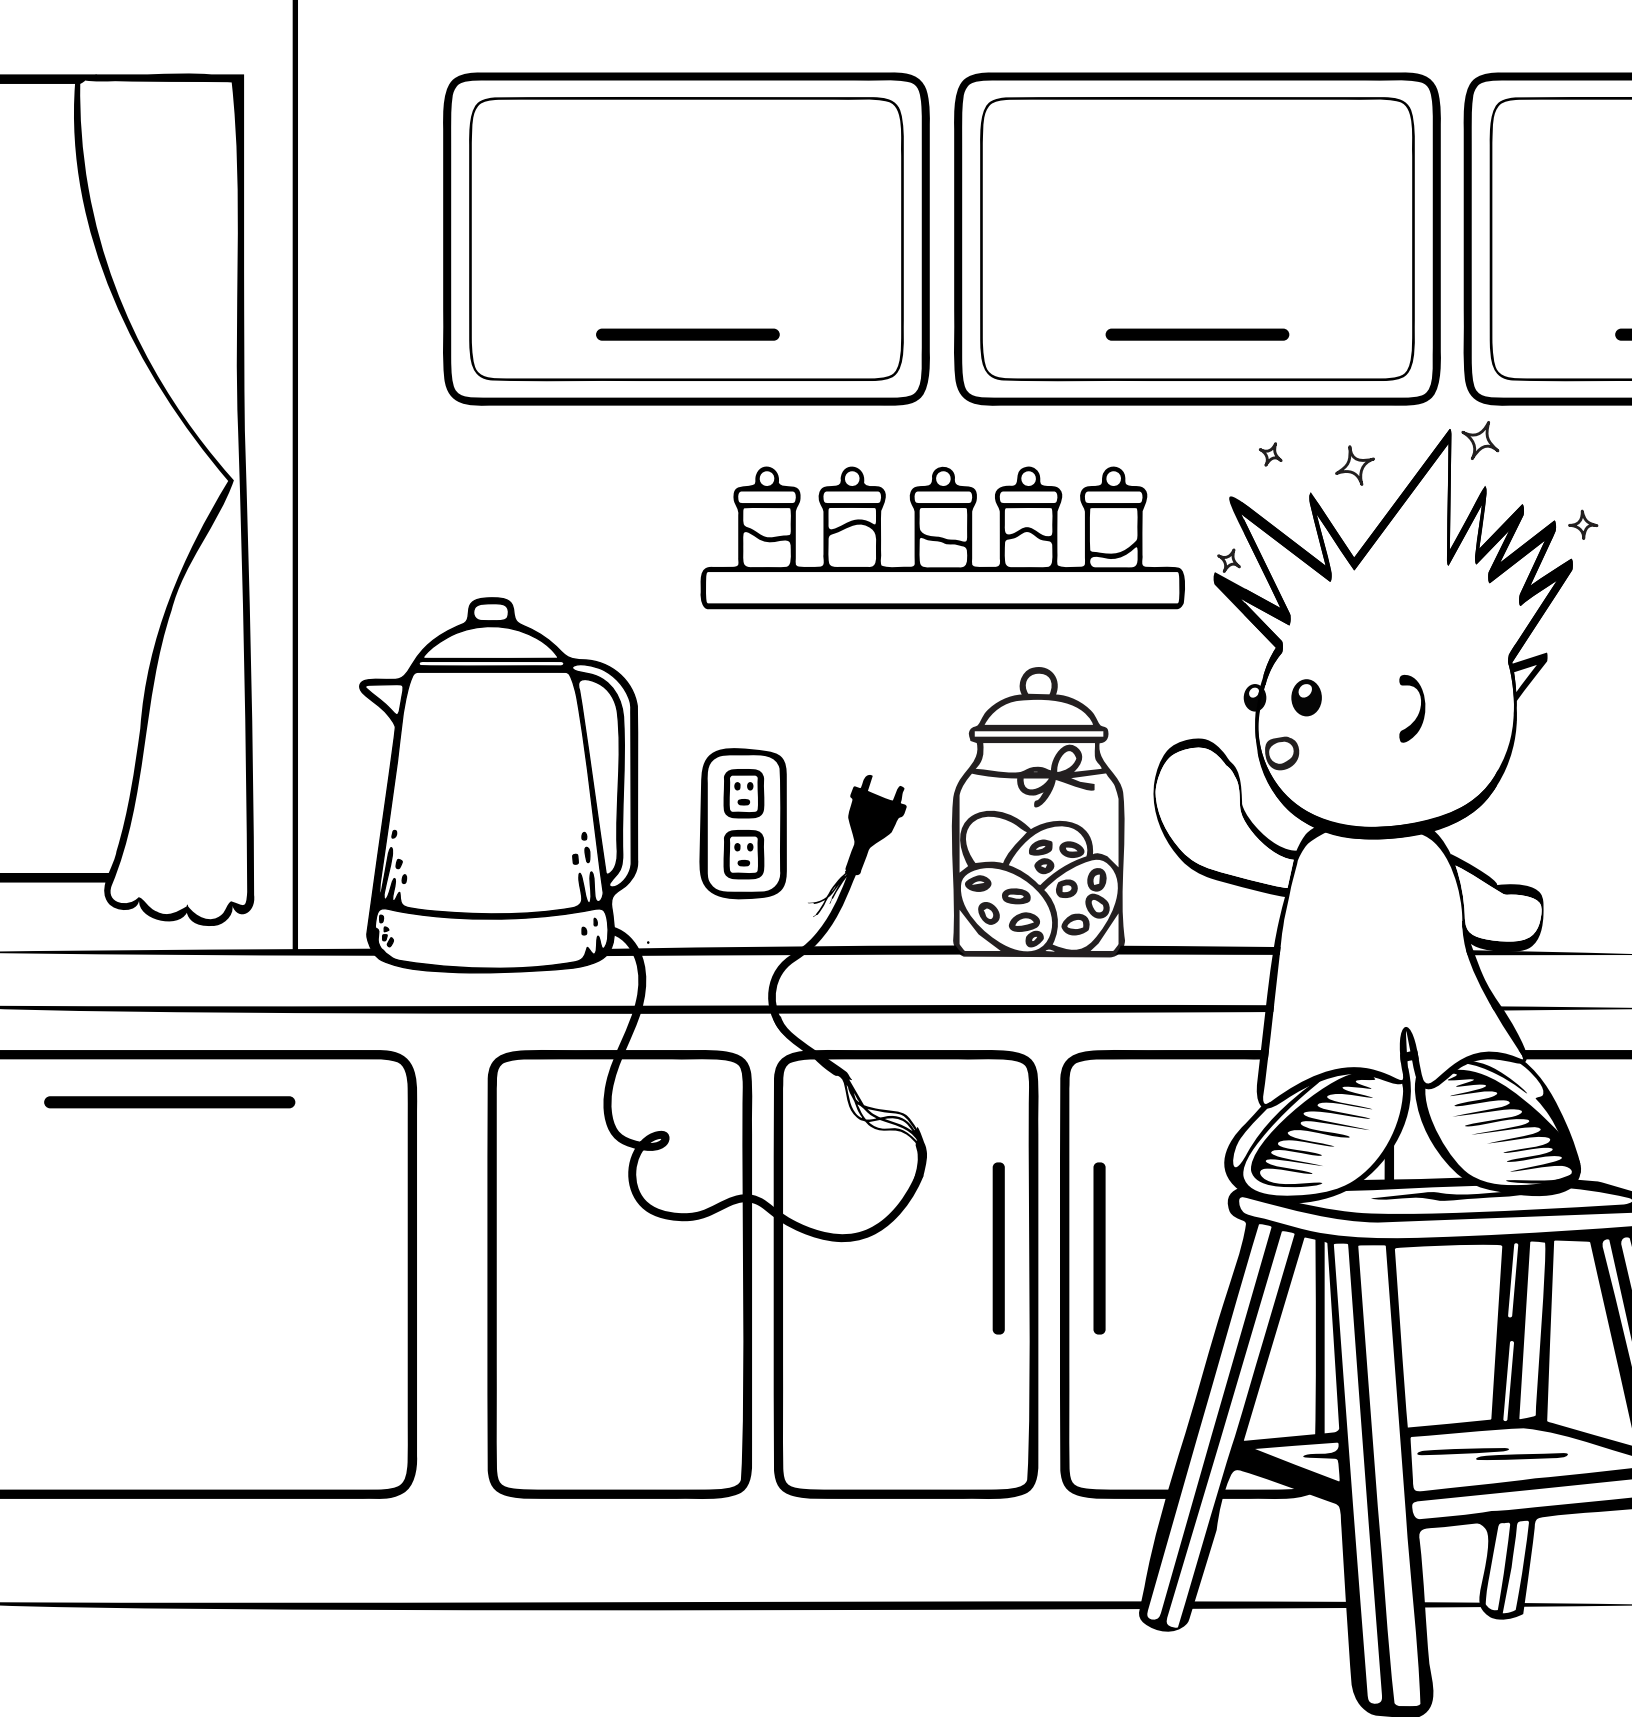

Hi! I'm Carter Current.

**I love to go exploring, especially when it means
I can help people find ways to stay safe from
electrical dangers in their homes. Let's go!**

**This room looks like a fun place to play.
But look out!
I see an outlet that has too many things plugged into it.
We better tell an adult.**

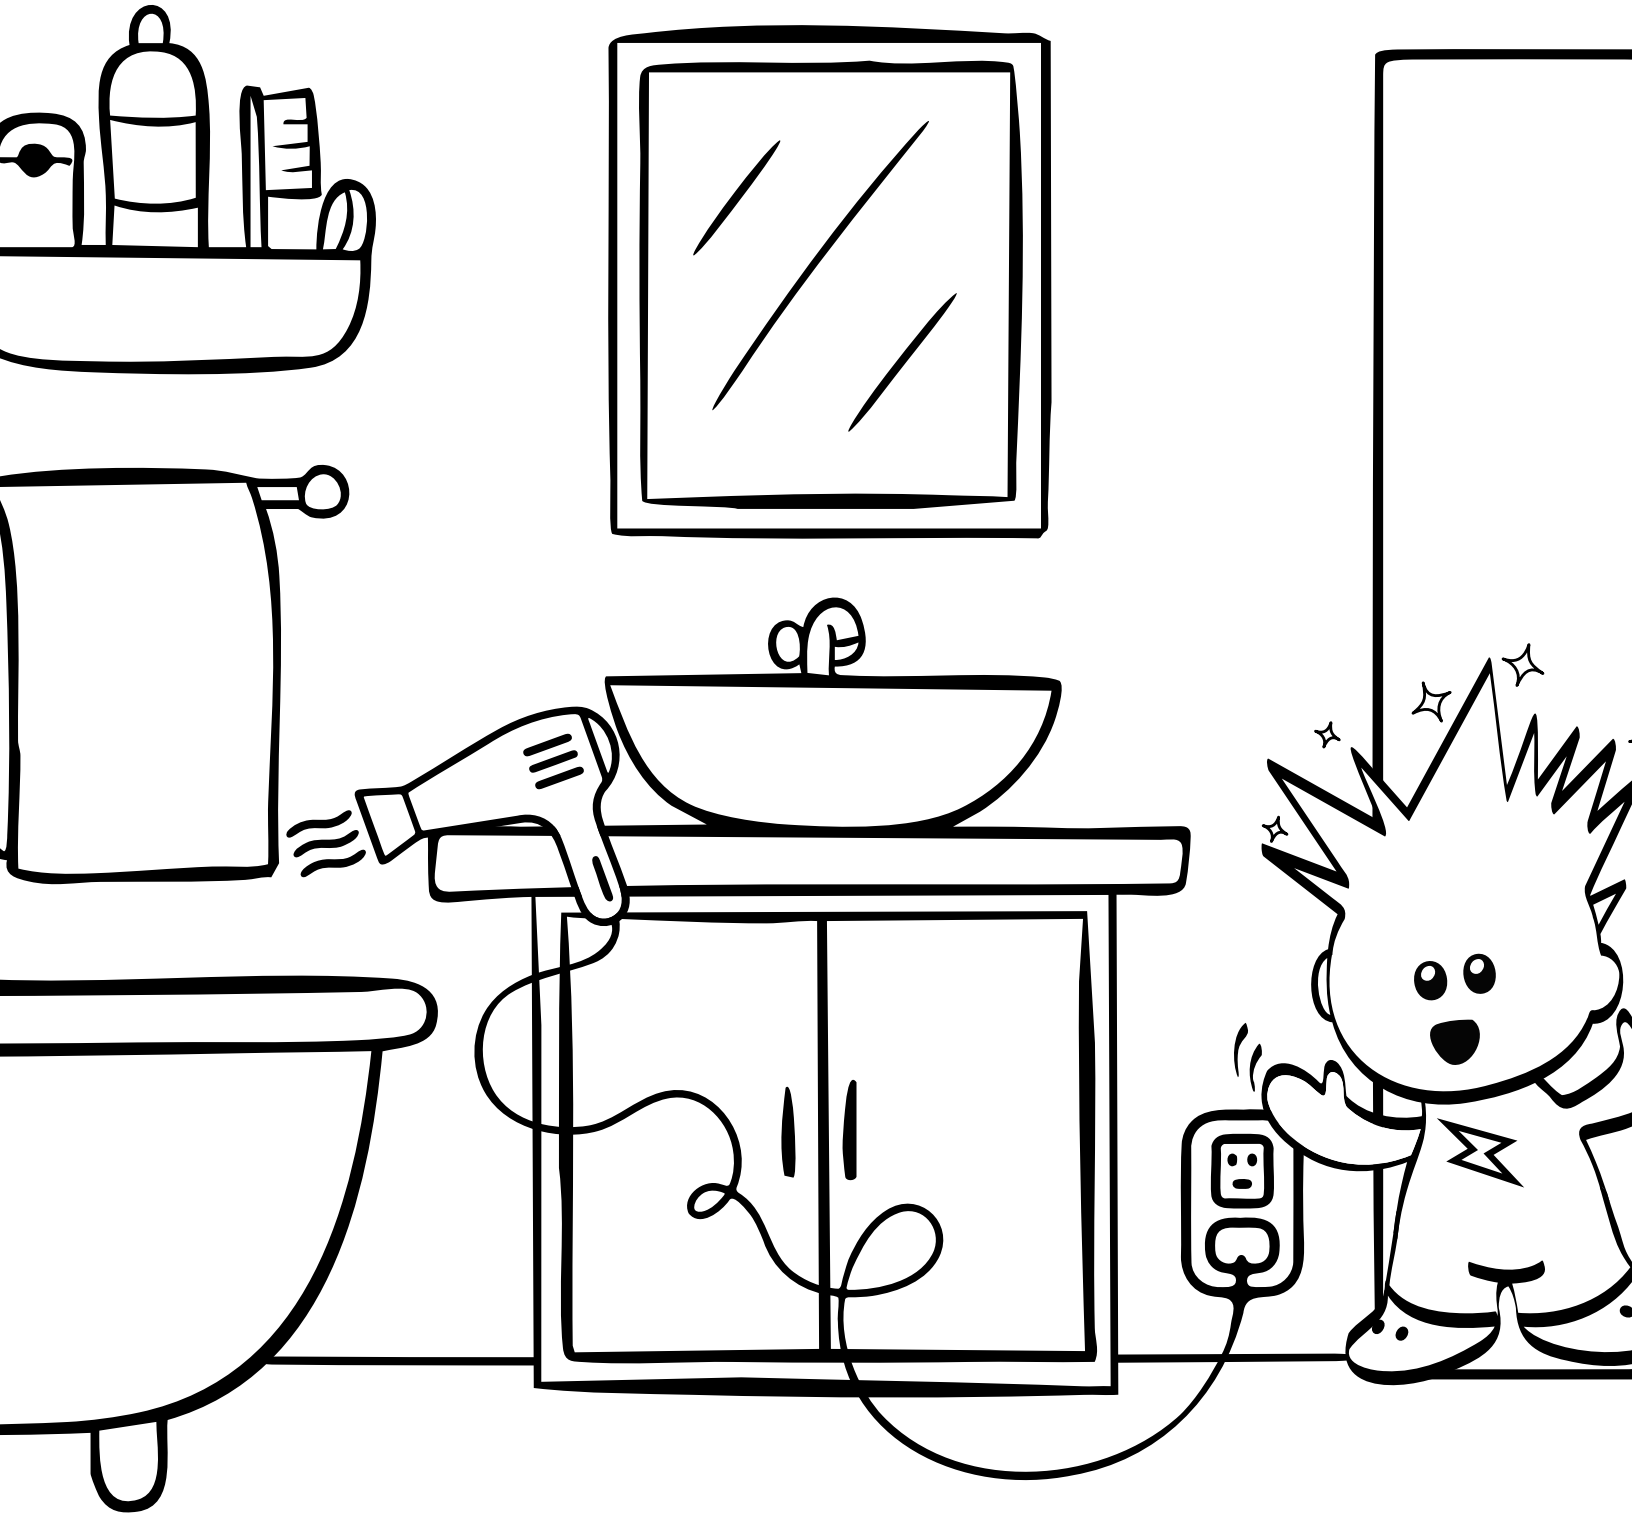

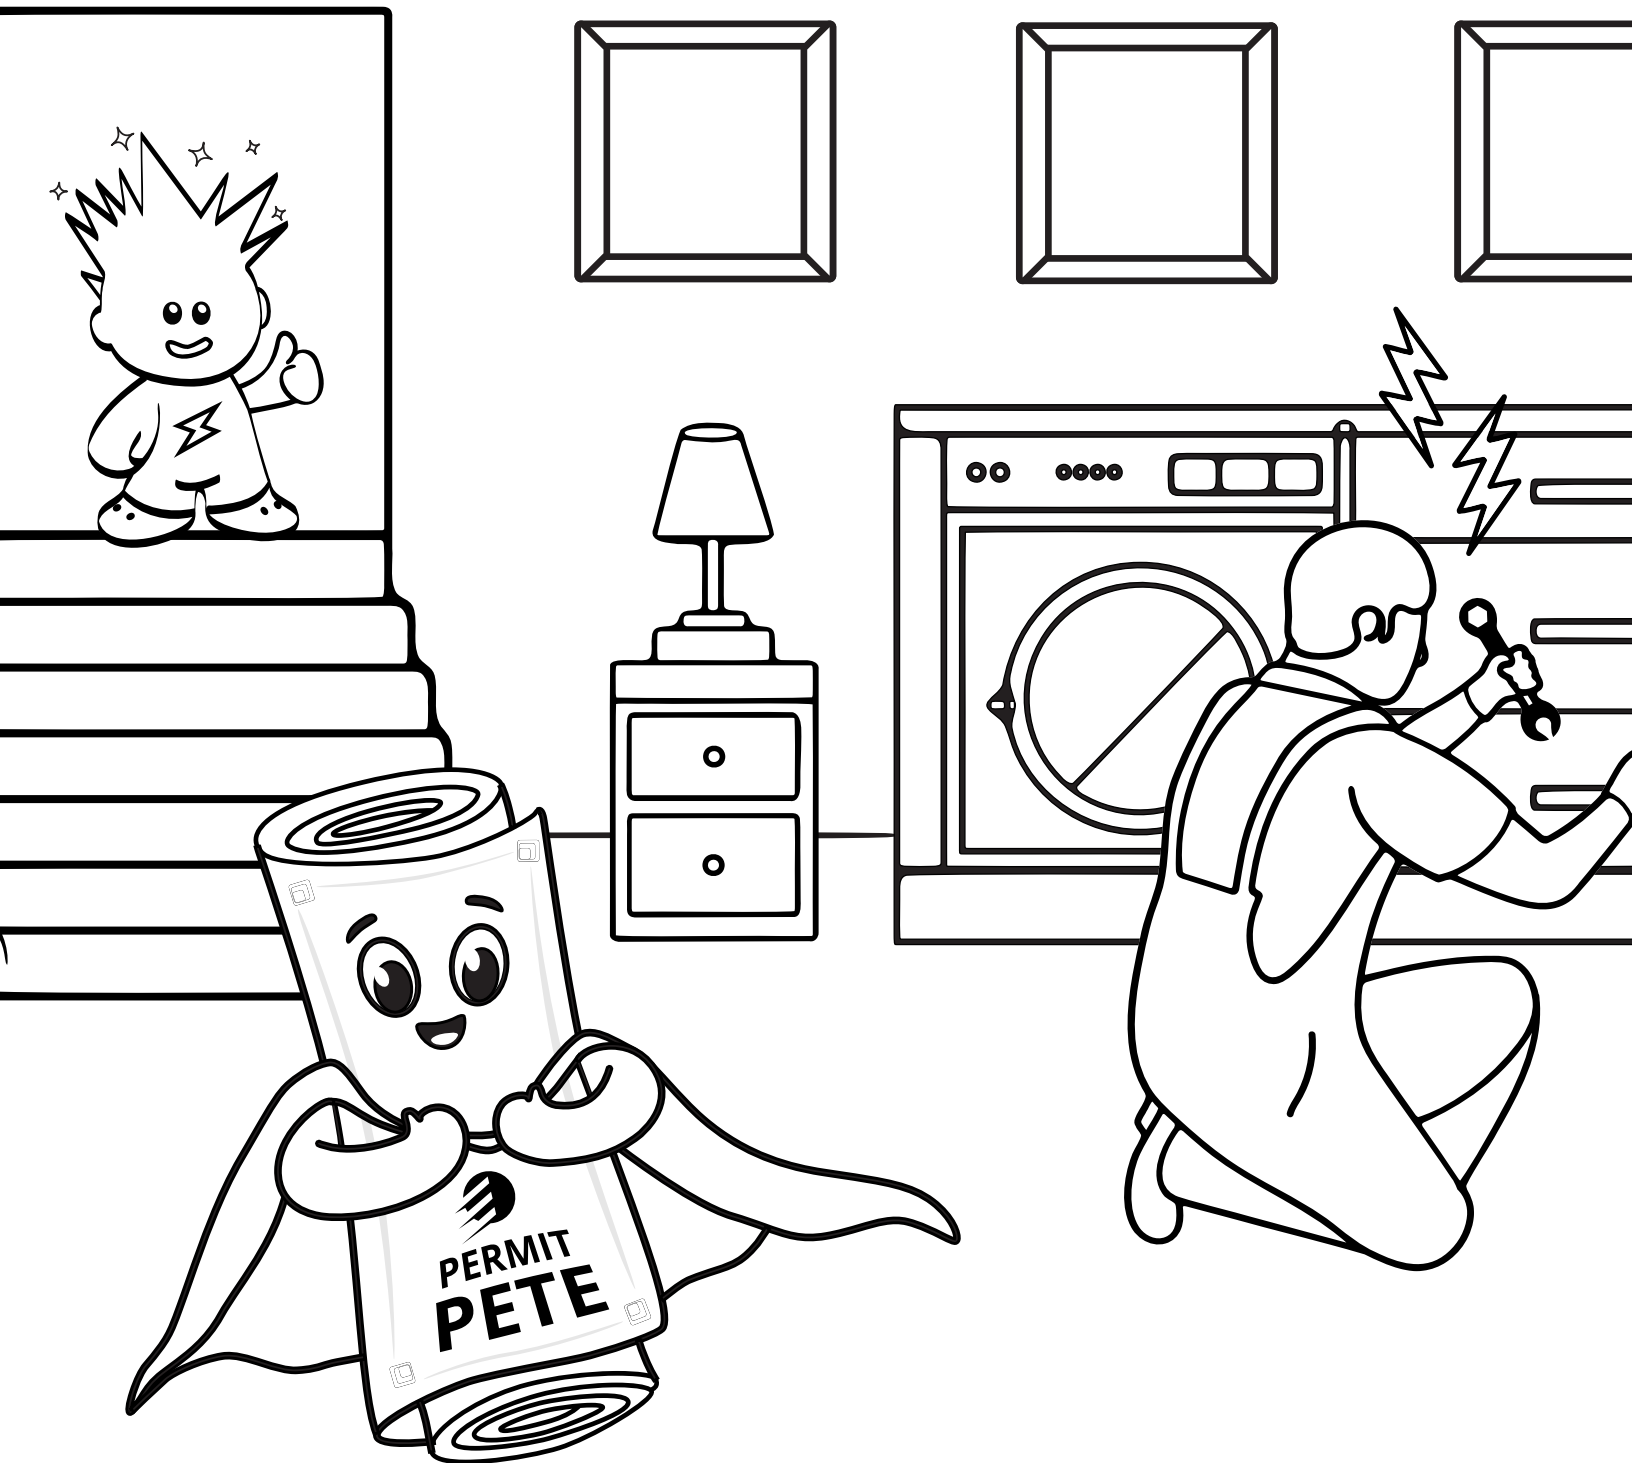

Every adventure needs a little snack!
Hmm... that kettle's cord is all frayed.
Another electrical danger, caught by Carter!

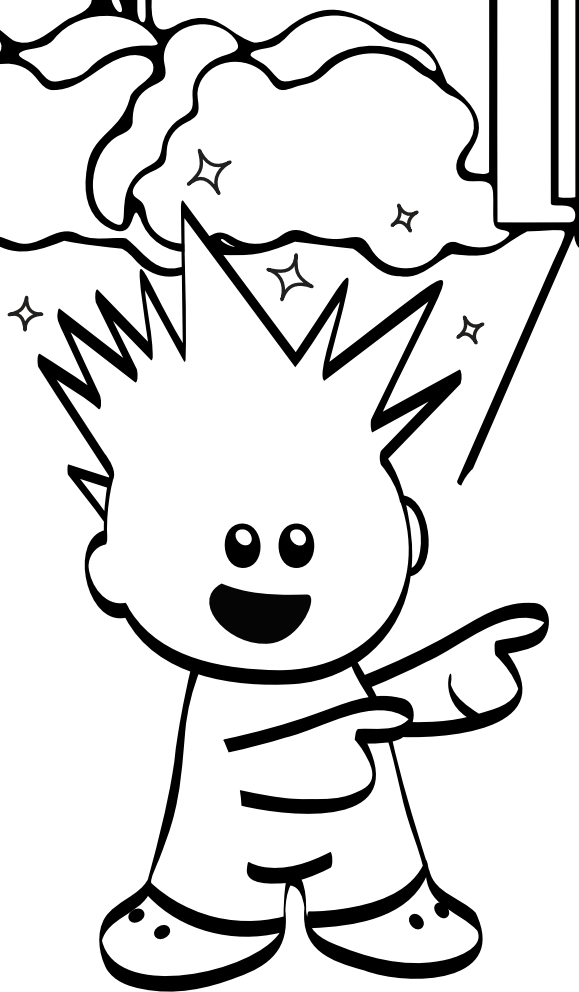

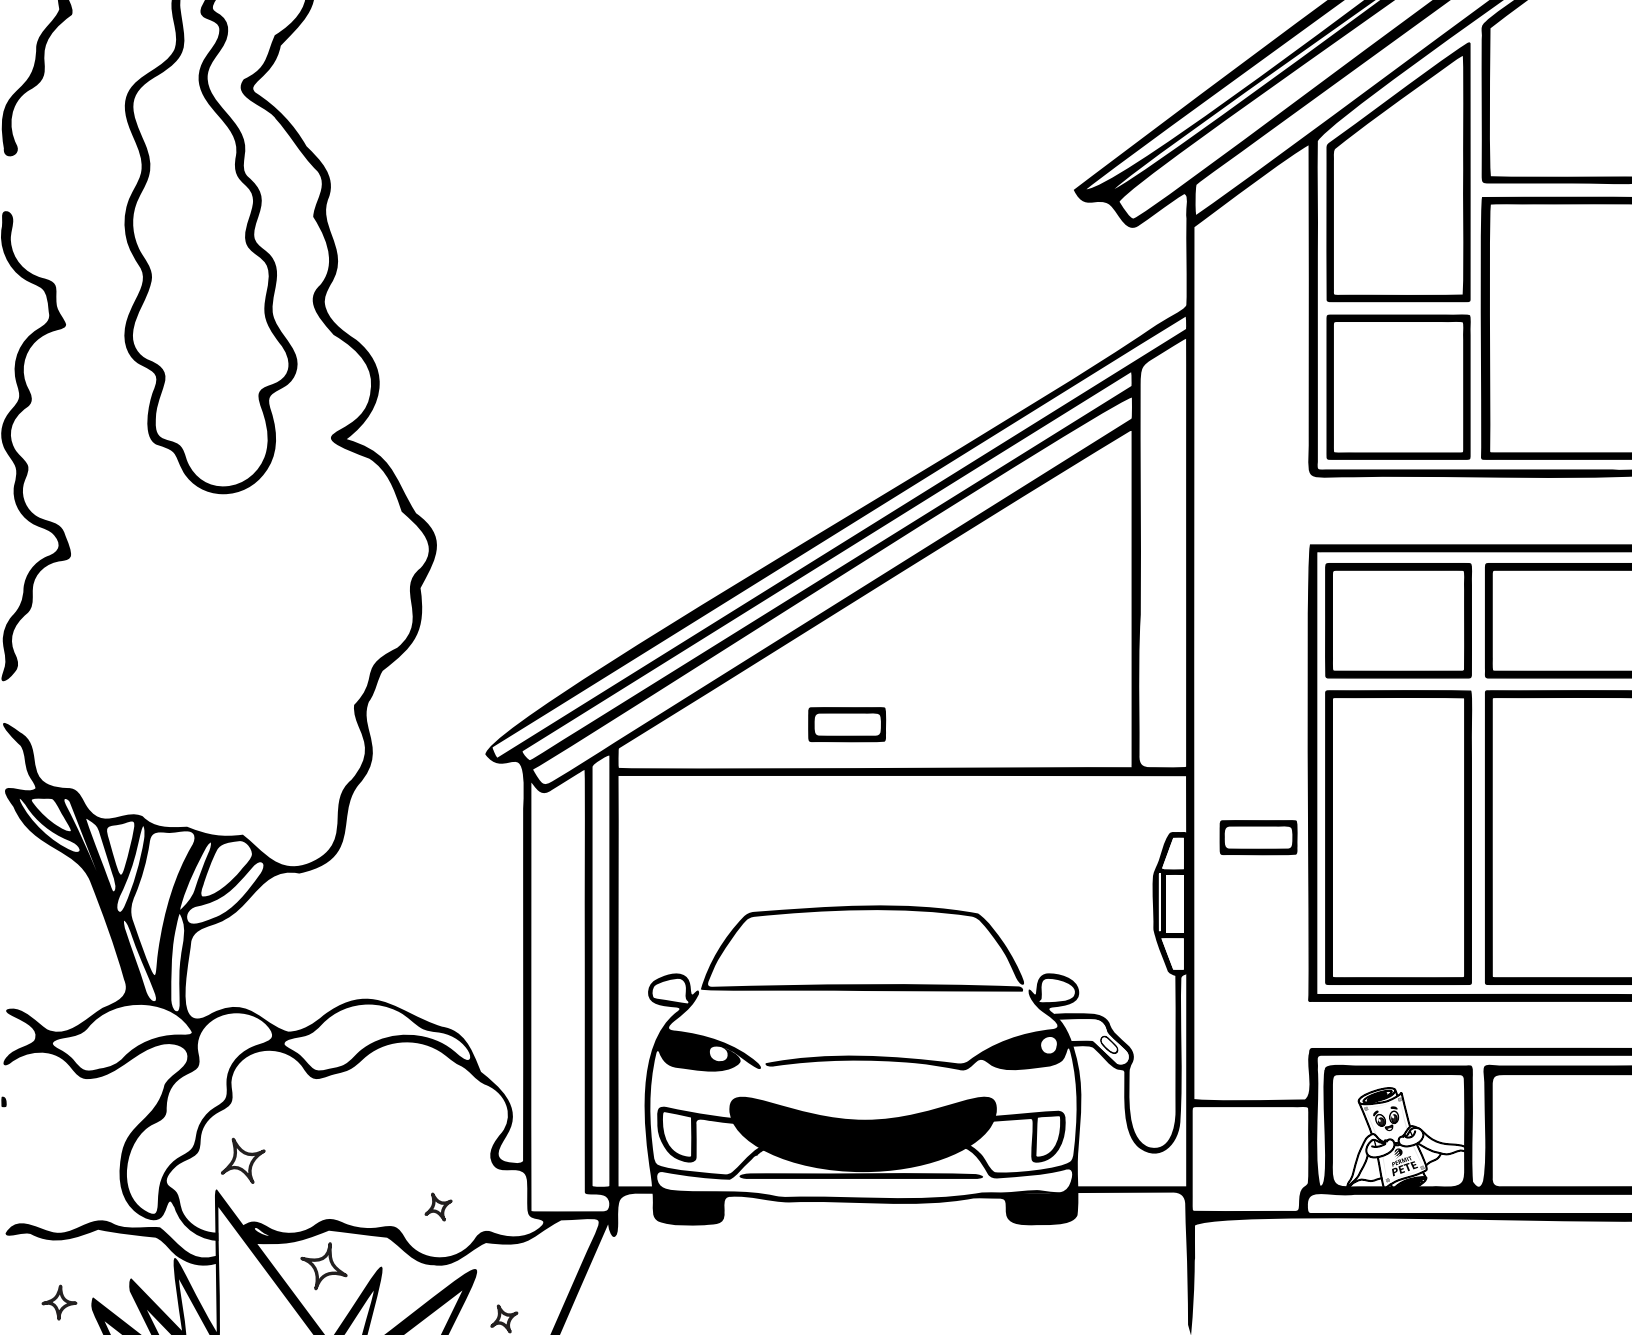

What's in here?

**That hairdryer is really close to the tub.
Electrical devices should stay far away from water.**

Look! The basement is being renovated!
We should stay out of here.
Don't worry, my good friend Permit Pete is here to
make sure the builders are being safe.

Time for some fresh air!

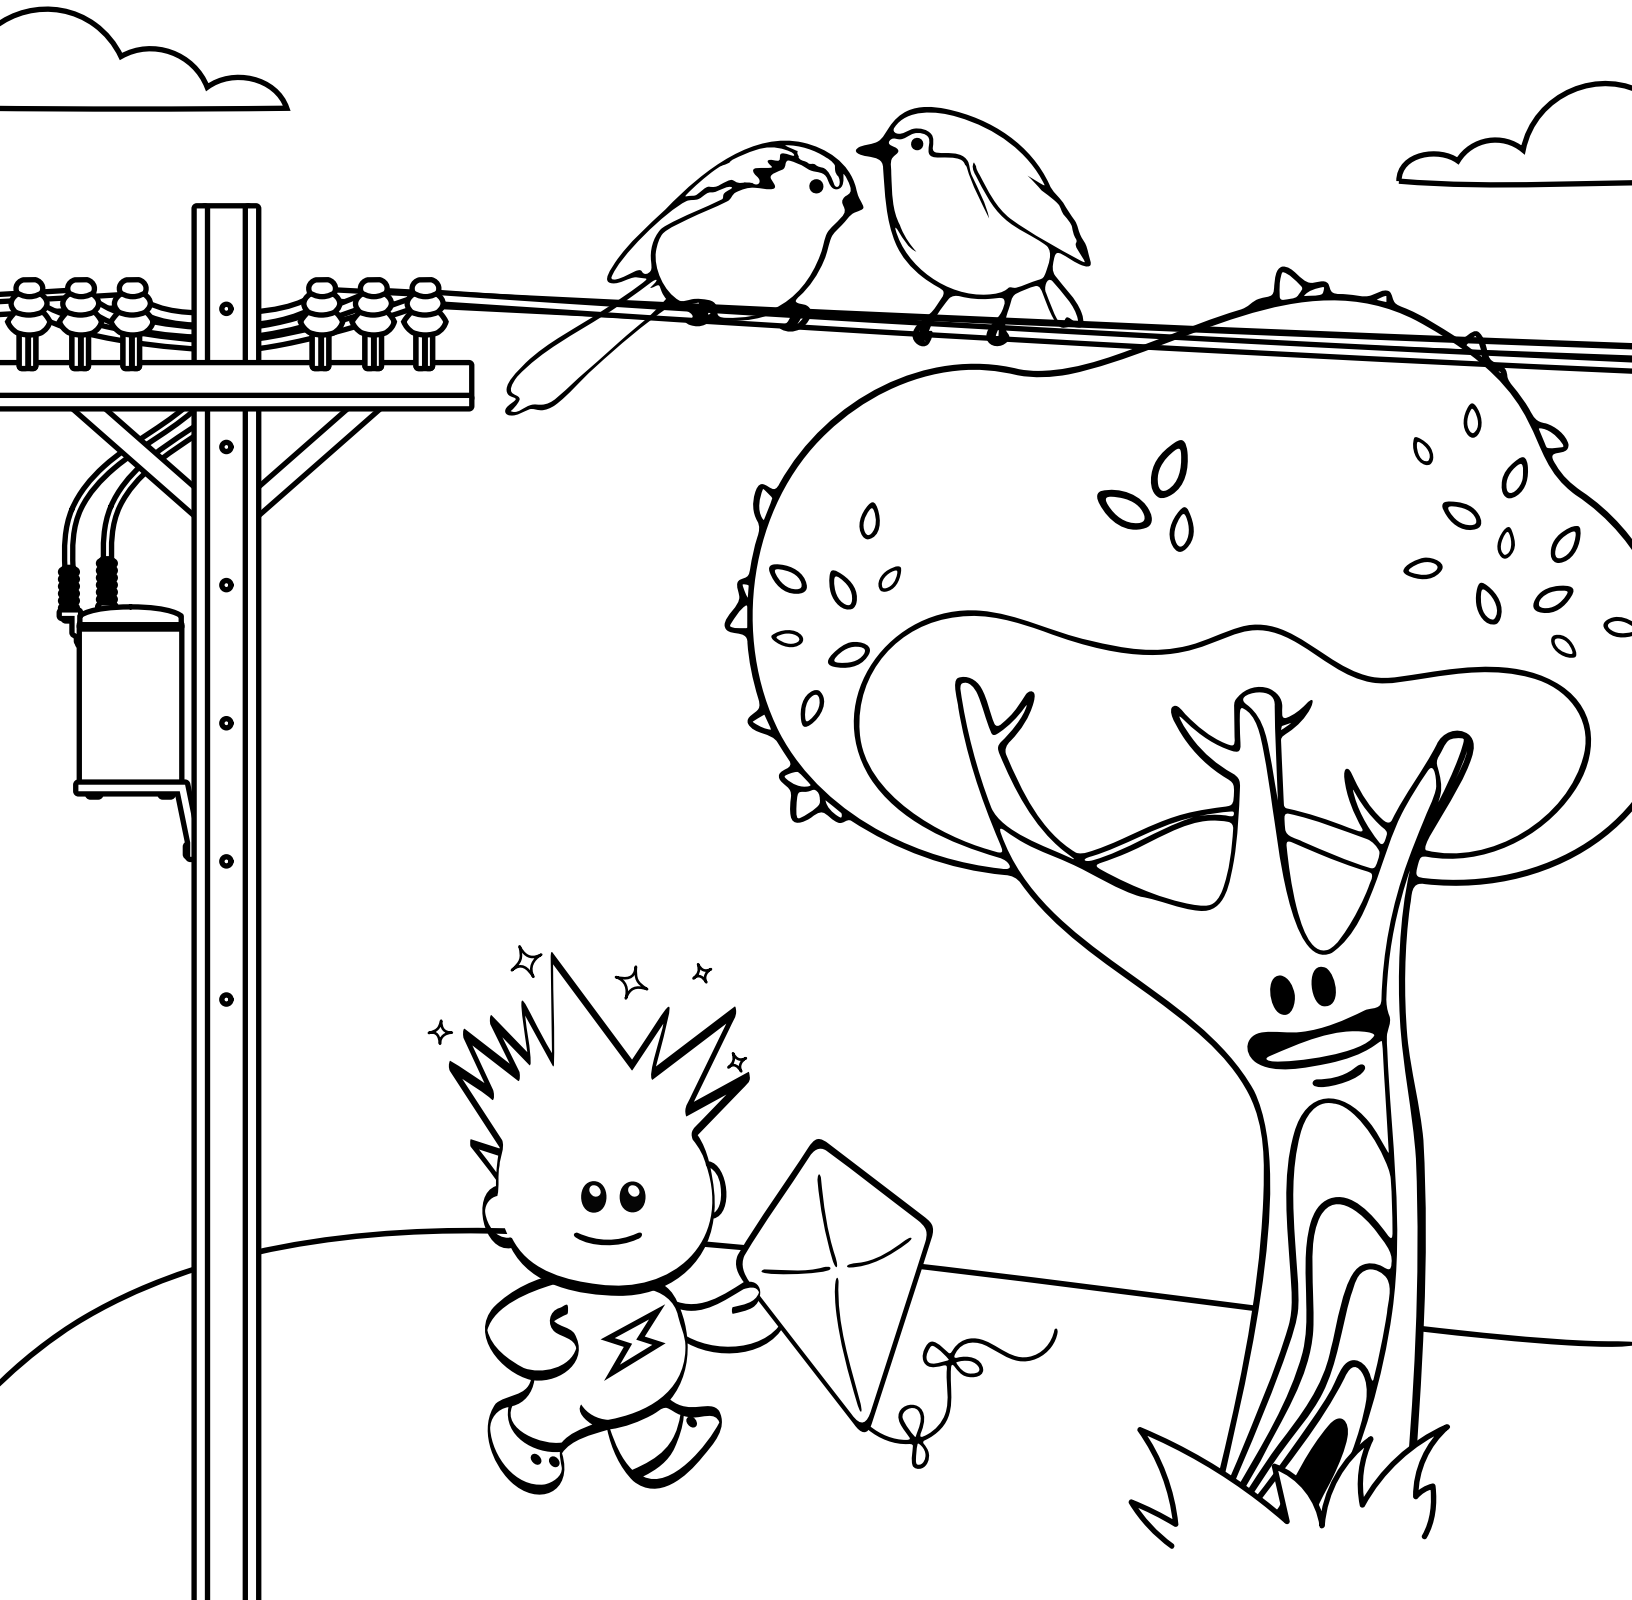

**That electric vehicle is safely
plugged into its charger, but
we should avoid playing near
the cord and charger.**

**Bikes or balls could damage them,
which can make them dangerous.**

Look up!

**Powerlines may be safe for birds,
but they're very dangerous for people.**

**That means we'll have to fly that kite somewhere
else, like a park or field, far away from powerlines.**

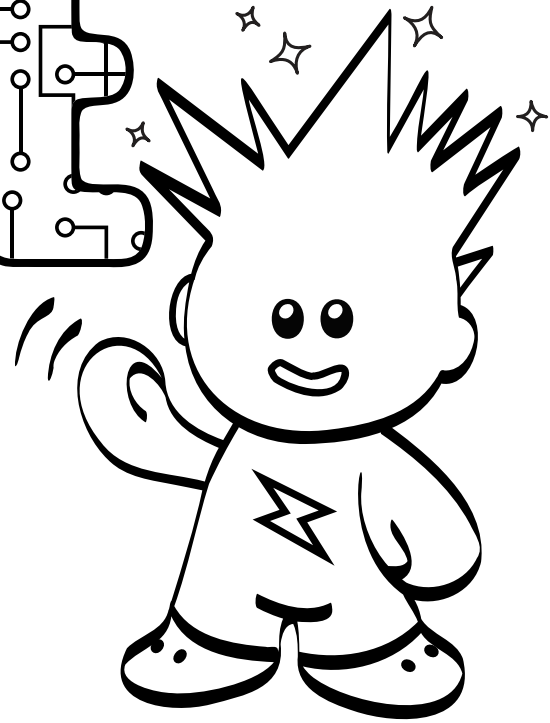

**That was a big day for such a small Current like me!
I'm going to sleep so soundly knowing we made this
home safer. Thanks for helping!**

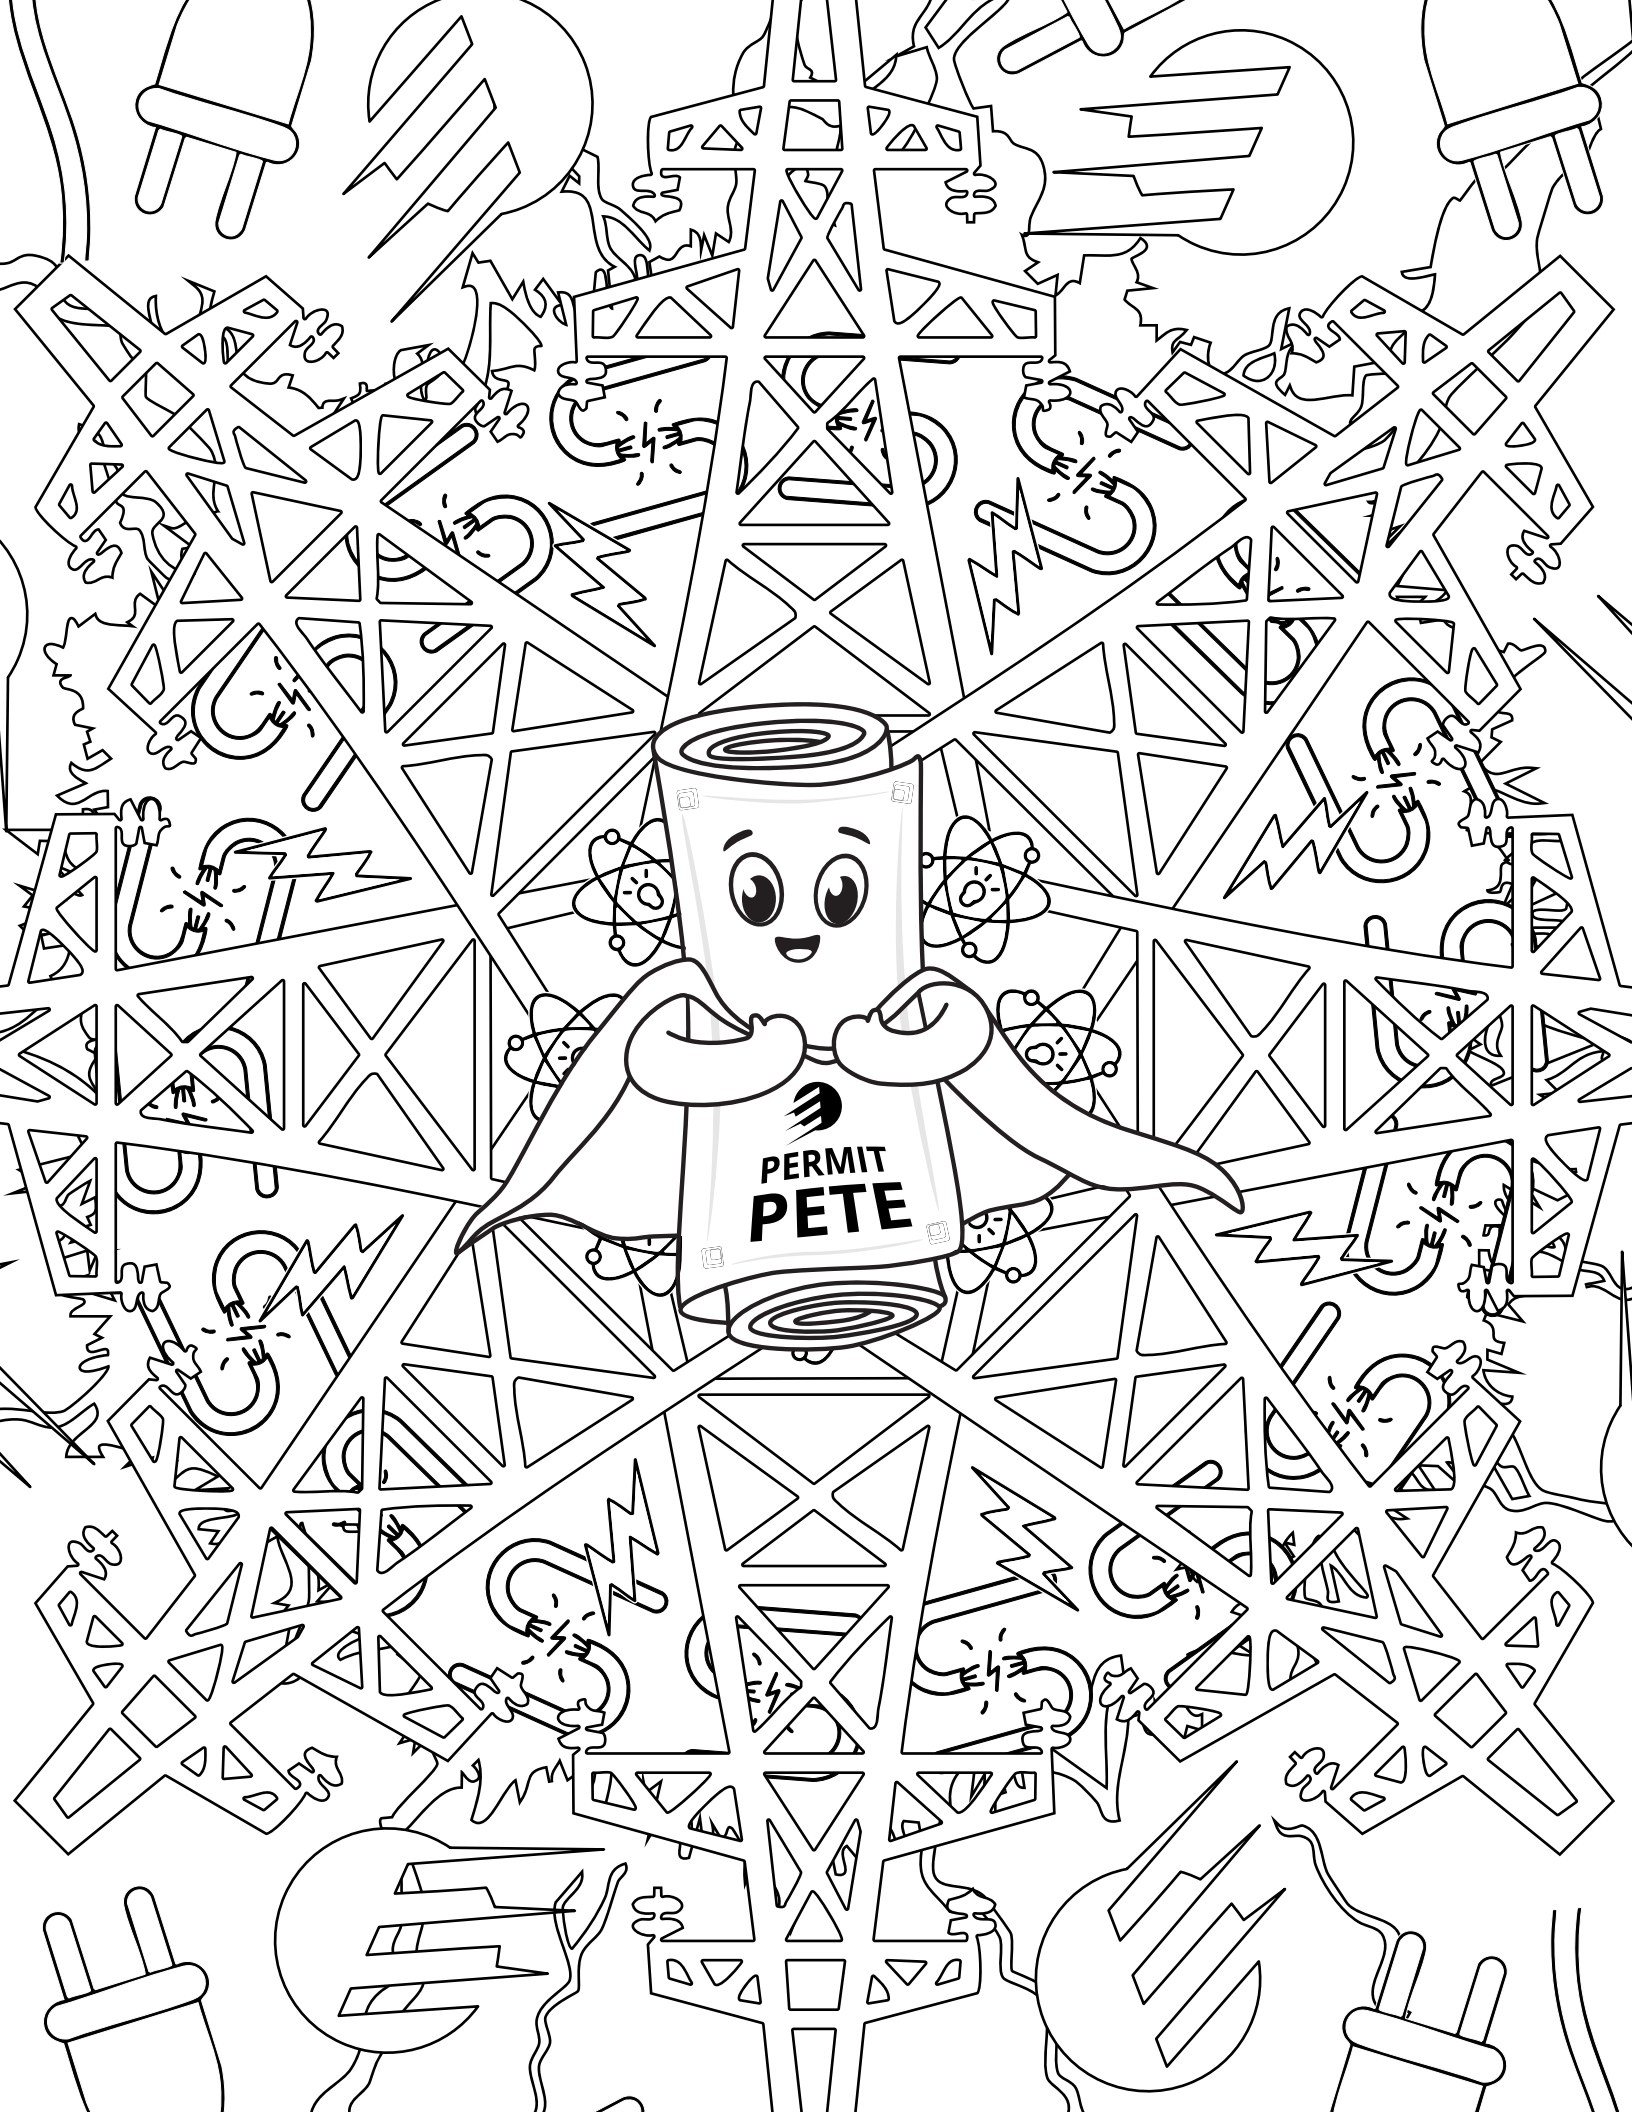

PARENTS'

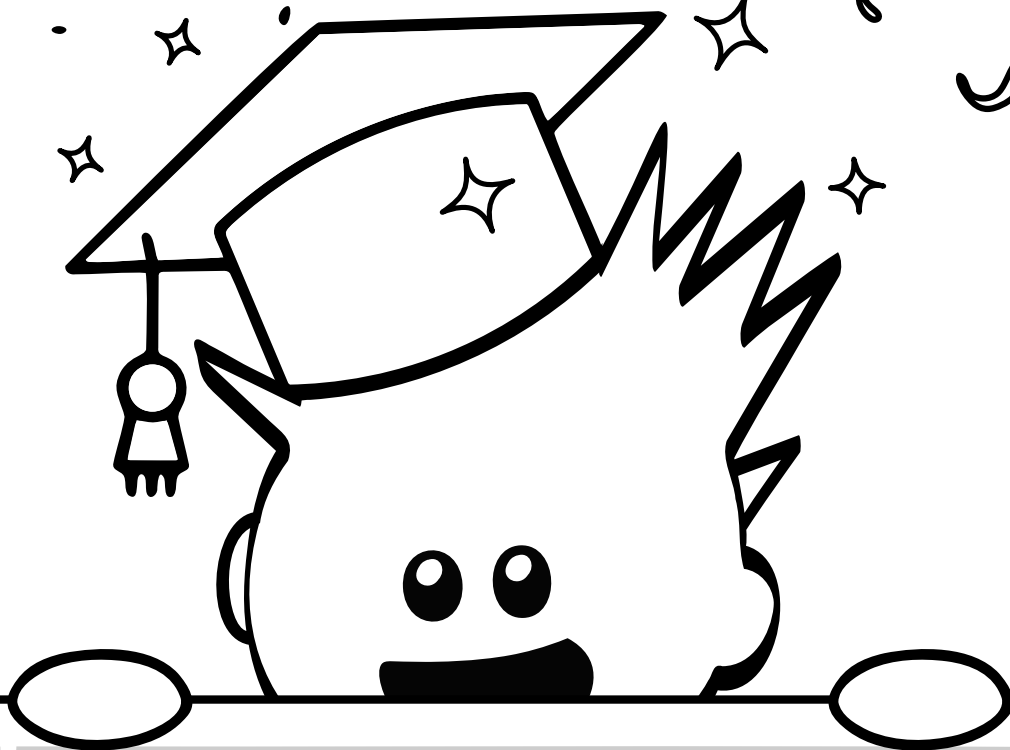

PAGE

**Sometimes grown-ups like to colour too!
We made this next page so they can join in.**

**Plus, it's important for them to get to know
Permit Pete... they'll need him for any electrical
work in the home, whether it's DIY or being done
by a Licensed Electrical Contractor.**

**THE ELECTRICAL SAFETY AUTHORITY
HEREBY CELEBRATES**

(YOUR NAME)

**FOR COMPLETING THIS COLOURING
BOOK AND LEARNING ABOUT
ELECTRICAL SAFETY AT HOME.**
